*Live births per 1,000 women in age group

**Rates are not calculated when the number of births is less than 10

^The 2005 total includes 8 births where the race of the mother is unknown

Note: Age-specific rates are live births per 1,000 women in specified age and racial group. General fertility rate computed by relating total births, regardless of age of mother, to women aged 15 - 44 years.
