

MURFREESBORO PIKE URBAN DESIGN OVERLAY

prepared by
Metropolitan Nashville Planning Department

ACKNOWLEDGEMENTS

The staff of the Metropolitan Planning Department thanks the many stakeholders who participated in the development of the Murfreesboro Pike Urban Design Overlay. Their thoughtful engagement on the vision of this area has been invaluable.

Special thanks are due to the following persons and entities:

Mt. View Elementary School and Mt. Zion Baptist Church for generously hosting our community meetings,

Councilmembers Jacobia Dowell, Karen Johnson, and Robert Duvall for facilitation and participation.

 The Planning Department does not discriminate on the basis of age, race, sex, color, national origin, religion or disability in access to, or operation of, its programs, services, and activities, or in its hiring or employment practices. For ADA inquiries, contact Josie Bass, ADA Compliance Coordinator, at 862-7150 or e-mail her at josie.bass@nashville.gov. For Title VI inquiries contact Shirley Sims-Saldana or Denise Hopgood of Human Relations at 880-3370. For all employment-related inquiries call 862-6640.

SECTION 1: INTRODUCTION

Introduction and How to Use This Document

Introduction

The Murfreesboro Pike Urban Design Overlay (UDO) is the result of the Antioch/Priest Lake community plan of 2012. Residents expressed a strong desire for healthier and more attractive development along Murfreesboro Pike between Rural Hill Road and the Davidson county line. This document represents a vision for healthy development along the corridor that is inclusive to all modes of transportation. This vision will be realized through strategies that evolved during a series of public meetings where issues were raised and design concepts were presented for input and discussion.

How to Use this Document

This document establishes the development standards that vary from the underlying base zone district standards for the properties in the Murfreesboro Pike UDO. All provisions described below as regulatory in nature have the same force and effect as, but are variations from, the standards set forth for the base zone districts in the zoning regulations of the Metro Code. Any final development construction plans submitted for approval under the UDO will be reviewed for adherence to these provisions and to the provisions of the base zoning that are not varied by the UDO.

This document is intended to guide future development in a manner that addresses the important issues raised and discussed during community meetings. A portion of the objectives and illustrations in the main body of this document pertain to areas for which Metropolitan Government exercises final authority over design, construction and operation of facilities, such as public rights-of-way and stormwater detention and conveyance. The incorporation of these standards into any final development construction plans will depend on Metropolitan Government review for consistency with policies, laws, and related standards of various departments.

The **Goals and Intent** are the result of the public planning process. They address multiple issues related to development including: buildings and lots, parks and open space, vehicular circulation, bicycle and pedestrian circulation, signage, transit, access, parking, landscaping and buffering. These goals dictate the purpose of the UDO.

The **Development Standards** are the applicable bulk standards; landscaping, parking and signage regulations that govern development in the UDO area.

The **Appendix** is dedicated to the methods by which the UDO was developed. It includes an overview of the study area inventory and analysis, a brief description of the public process, and a list of participants.

SECTION 1: INTRODUCTION

Location and Site Description

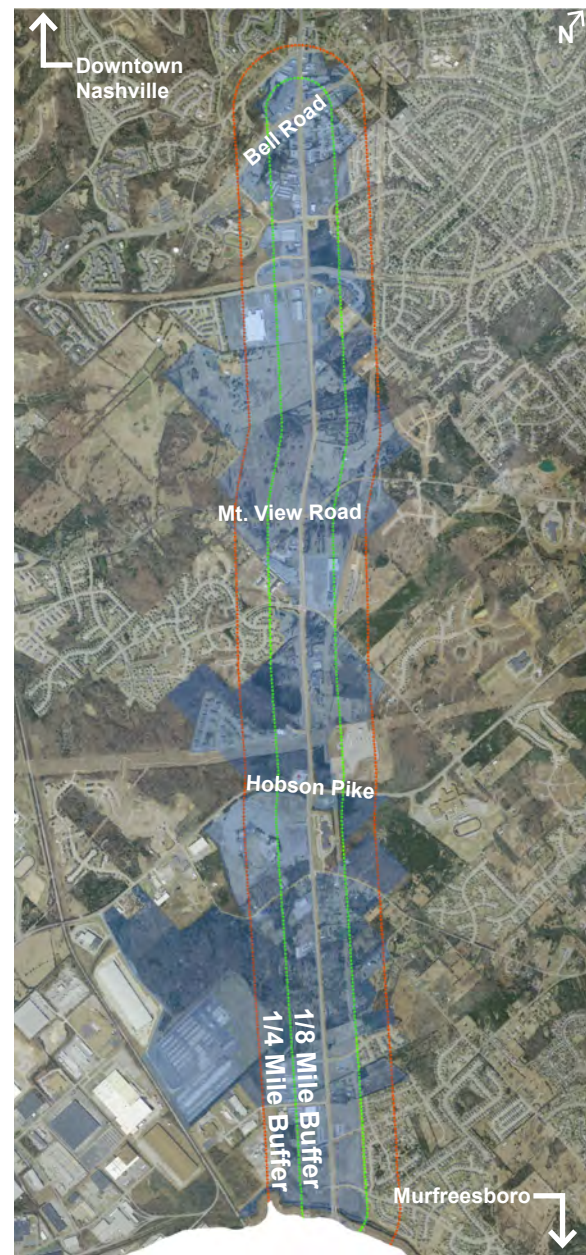

The Murfreesboro Pike corridor (Murfreesboro Pike and Lafayette Street) stretches fourteen and a half miles from the roundabout at the Music City Center in downtown Nashville down to the Davidson/Rutherford county line.

In the process of Antioch/Priest Lake Community Plan Update (adopted October 25, 2012), residents of the area expressed a strong desire for a better development pattern along Murfreesboro road. A call for architectural standards and better landscaping was established. Residents also wanted to see development that was still convenient to vehicular traffic, while providing safe opportunities for mass transit options and pedestrians.

The Murfreesboro Pike Corridor is largely zoned Commercial Service (CS), one of the most auto-oriented zoning districts in Davidson County. The commercial base zoning ensures an auto-dominated development pattern, with large buildings at the back of lots abutting single-family homes and prohibiting buildings close to the street, but it also prohibits residential development.

The UDO is a tool that requires specific design standards for development in a designated area. UDOs can modify zoning standards such as setbacks, building height, floor area ratio, and parking. The only standard a UDO can not modify is the land uses allowed by the base zoning district.

Additionally, there are some properties that will be unable to develop to the full potential that the UDO envisions due to the restrictions of the existing base zoning. In these cases, a rezoning will be required to take full advantage of the provisions offered by the UDO. In previous UDO applications that were paired with a rezoning, the Planning Department and the Metro Council sponsored these requests and there were no fees to the property owners. In light of this, one of the incentives offered by this UDO is that rezoning application fee will be waived for those properties that choose to rezone to a district that permits uses and density consistent with the goals of the UDO.

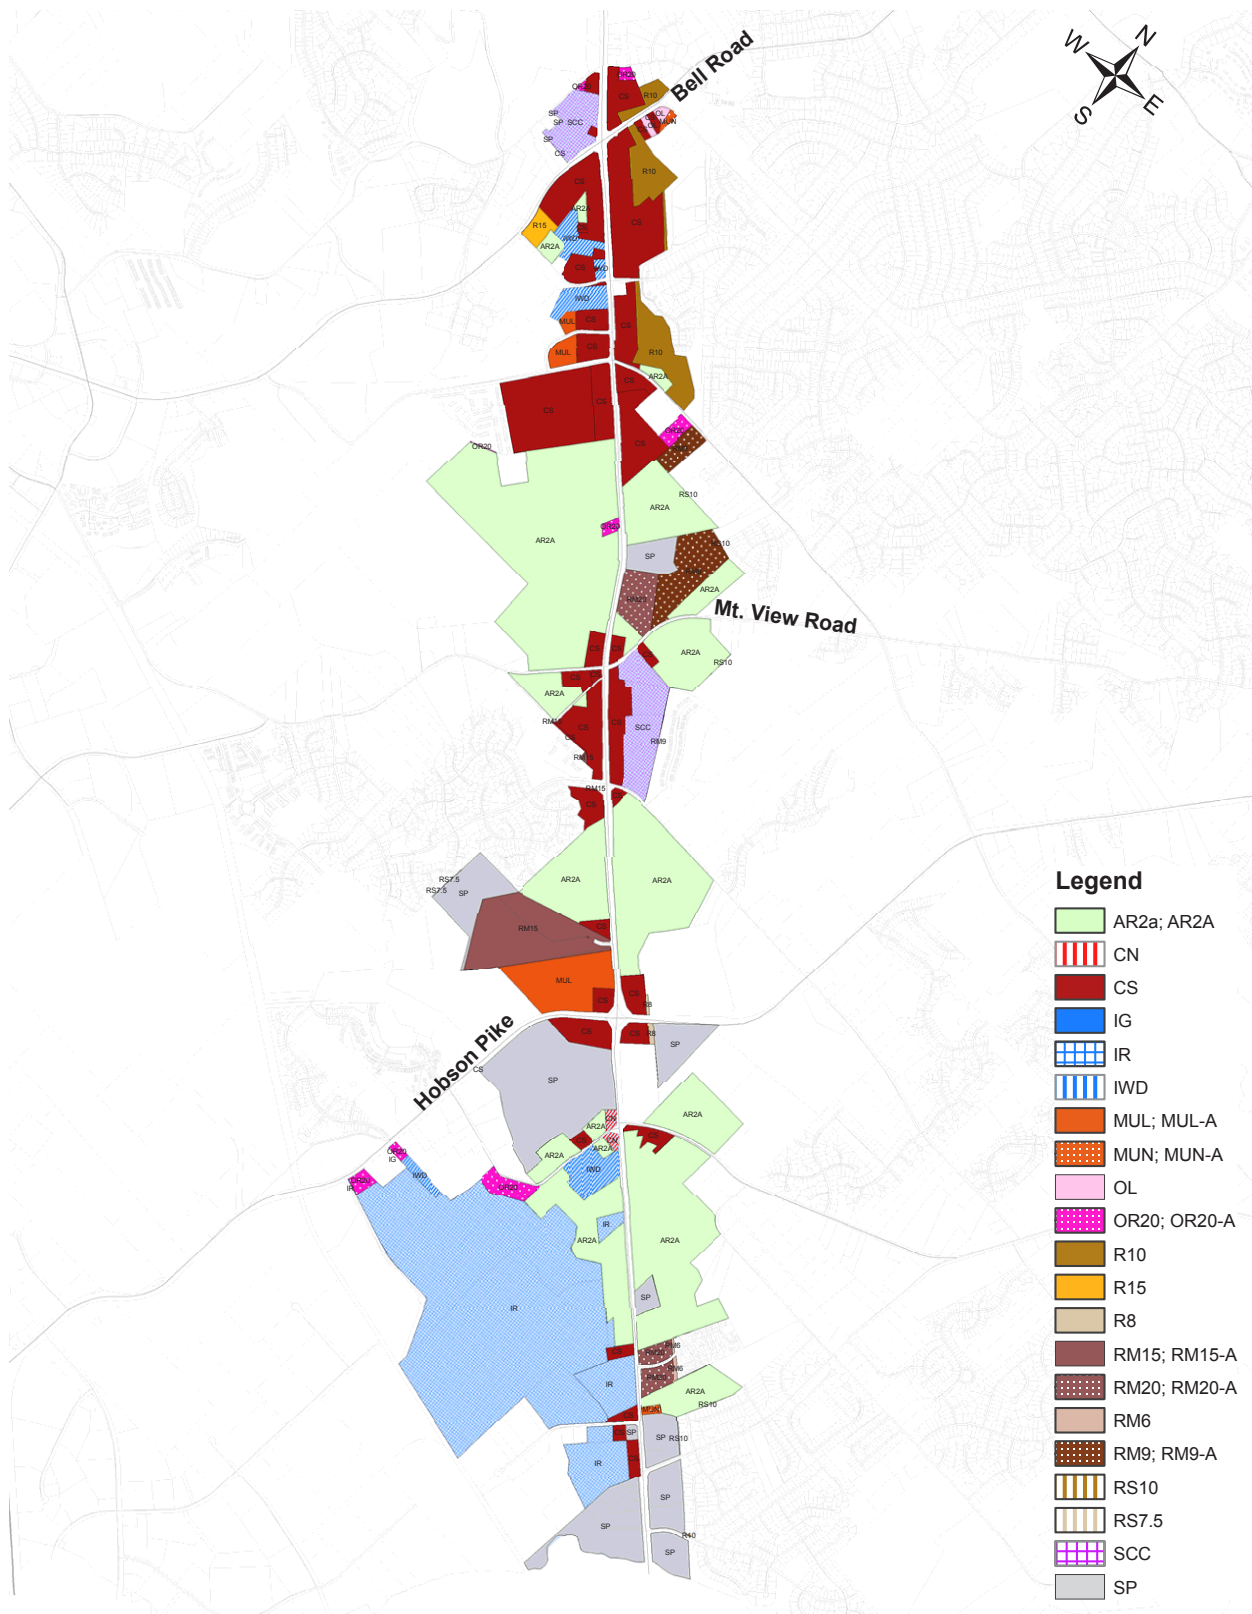

Murfreesboro Pike UDO Study Area

There are a few properties within the UDO boundary zoned Specific Plan (SP) or in another UDO. As long as the SP is in place, SP will be the controlling zoning, however, is that SP is removed then the UDO will apply. As long as the original UDO is in place that UDO's standards shall apply.

SECTION 1: INTRODUCTION

UDO Properties

SECTION 1: INTRODUCTION

Goals and Intent

Intent:

The intent of the Murfreesboro Pike UDO is to foster suburban development that is pedestrian friendly while still accommodating for the market needs of suburban development. This UDO focuses on broad design standards while emphasizing best practices for quality suburban design.

Goals:

Goal 1. Enhance values along Murfreesboro Pike corridor through high-quality design and cohesive placemaking.

Goal 2. Provide accommodations for all transit modes including vehicular, bicycle, transit, and pedestrians with the design of the site.

Goal 3. Utilize stormwater best management practices to reduce/eliminate stormwater run-off from the site, reduce impervious surfaces, and enhance overall water quality.

Goal 4. Provide high-quality landscaping on the site enhancing the site aesthetically, reducing the heat-island effect and providing adequate buffers for cars, adjacent properties and unsightly site elements.

Goal 5. Reduce the visual impact of surface parking lots and provide cross-access easements connecting to future development on adjacent properties.

Goal 6. Provide high-quality architecture and place the building(s) so that Murfreesboro Pike is addressed prominently.

Goal 7. Design signage as an integral part of the overall building design.

SECTION 1: INTRODUCTION

DEVELOPMENT STANDARDS

Application of the Standards
Building types
Bulk Standards
Architectural Treatment Standards
Parking and Access
Landscaping, Buffering and Screening
Signage

SECTION II: DEVELOPMENT STANDARDS

Application of the Standards

Compliance Provisions

Compliance with the UDO standards shall be required as follows:

1. Full compliance with the Development Standards shall be required when:
 - Property is redeveloped or vacant property is developed
 - The total building square footage of any expansion(s) is greater than 25% of the total building square footage of all improvements on the lot prior to expansion.
 - When a new structure is built on a lot with multiple structures, the new structure shall be in compliance with all the Development Standards.
2. Compliance with the landscaping, buffering and screening standards and the sidewalk and street tree provisions shall be required when:
 - The total building square footage of any expansion(s) is between 10 percent and 25 percent of the total building square footage of all improvements on the lot prior to expansion, or
 - The value of any one building permit or the value of multiple building permits reaches 25 percent or more of the total value of all improvements on the lot prior to application for the building permit.
 - For the purpose of the above paragraph, the “value of all improvements on the lot prior to application for the building permit” initially will be determined by reference to the official records of the Davidson County Assessor of Property. If the improvements on the lot currently meet Metro Code standards, then the owner may, at their option, submit a commercially acceptable estimate of the replacement cost of the improvements, which may be used as an alternate method to determine their value.
 - Expansions shall not be constructed on the front, street side, of a structure, unless the proposed expansion would bring the structure more into compliance with the standards of this UDO.

Signage

Notwithstanding the above, the Signage Standards of the UDO shall apply when a sign permit is required, including the replacement of a sign panel, according to the following provisions.

- New signs shall comply with all Signage Standards.
- Existing single tenant signs shall be brought into compliance when a change to the sign requires a sign permit.
- Existing multi-tenant signs of a type permitted in the subdistrict (monument, pillar, projecting, wall-mounted) may be permitted for individual tenant-sign change without achieving full compliance as to size, location, and illumination.
- Existing multi-tenant signs of a type prohibited in the subdistrict (pole-mounted, etc.) shall be permitted to install new sign panels. Panels installed must be compliant with the illumination standards set forth by the UDO.
- Notwithstanding the above, a non-conforming sign damaged by any involuntary means may be reconstructed to its pre-damage condition.

Applicability

Base district standards that are not varied by the provisions set forth in the Murfreesboro Pike Urban Design Overlay shall apply as applicable to all property within the UDO boundary.

Process

Final site plans shall be submitted in the future for any development within the boundary of the UDO. Final site plans shall consist of a detailed set of construction plans that fully demonstrate compliance with the UDO and shall specifically describe the nature and scope of development to serve as the basis for the issuance of permits by the Codes Department and all other applicable Metro departments. Following the approval of the final site plan, a final subdivision plat may be required to establish lots, rights of way and easements. Bonding for these improvements will be required.

SECTION II: DEVELOPMENT STANDARDS

Modifications and Process

Prior to applying for a building permit, applicants shall submit to the Planning Department complete sets of final construction documents, including site plan and landscape plan, for review and approval prior to the issuance of permits.

Subdivision plats may be required to dedicate required cross or joint access, right-of-way or utility easements and must be recorded before building permits can be issued.

Applicants are encouraged to work with Metro Planning staff early in the design and development process. Where obvious physical constraints exist on a site within the UDO, Planning staff will review alternative design solutions that achieve the intent of the UDO.

Modifications

The natural landscape and man-made environment may present difficulties in compliance with some standards of the Murfreesboro Pike UDO. Based on site-specific issues, modifications to the standards may be necessary. Modifications may be permitted because of the exceptional narrowness, shallowness or shape of a specific piece of property, exceptional topographic condition, or other extraordinary and exceptional condition of a property. The condition shall be unique to the subject property and generally not prevalent to other properties in the general area, or have been created by the previous actions of any person having an interest in the property after the effective date of this ordinance.

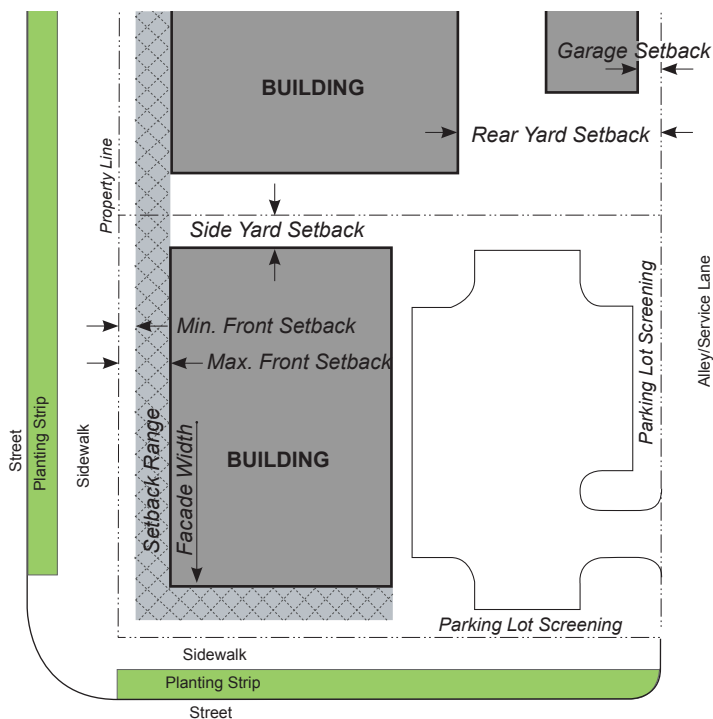

Any standard within the UDO may be modified, insofar as the intent of the standard is being met; the modification results in better urban design for the neighborhood as a whole; and the modification

does not impede or burden existing or future development of adjacent properties. Any standards that shall not be modified are explicitly noted as such in the code.

Modifications shall be approved by Planning Commission or its designee. Minor modifications – deviations of 20 percent or less – may be approved by the Planning Commission's designee. Any determination made by the Planning Commission's designee may be appealed to the Planning Commission within seven business days. Major modifications – deviations of over 20 percent or more – may be approved by the Planning Commission.

SECTION II: DEVELOPMENT STANDARDS

Bulk Standards Calculations

Building Plan

Building Section

Setbacks

Setbacks are determined by the ground floor use – residential or non-residential.

A setback range (minimum and maximum) is indicated for the front yard setbacks. The setback shall be measured from the back of the sidewalk at the property line. If additional sidewalk is dedicated by the property owner, the setback shall be measured from the back of the new sidewalk. The front yard setback shall also apply to secondary street frontages.

Height

Building height shall be measured from the average grade along the front property line to the top of eave or parapet. When buildings are set back from the back of sidewalk more than 20 feet, height shall be measured from the average grade at the building setback.

Façade Width

The façade width is the length of building façade that is built within the setback range. The required façade width is determined by the Subdistrict and street type. The façade width standard shall only apply to the predominant street frontage and no minimum shall be required along a secondary frontage if the property is located at the intersection of two or more streets.

SECTION II: DEVELOPMENT STANDARDS

Building Types

For the purpose of establishing bulk standards that are specific to the building's context and purpose, the following building types have been established:

Residential Building Type

Residential buildings come in various forms from the single-family home to cottages to townhouses and stacked flats buildings. Buildings that are exclusively for residential uses are set back from the sidewalk in order to provide privacy to the residents. This setback can be limited, as in the case of a building with a shallow stoop and stairs to the street, or quite deep as with some single family homes.

Mixed Use or Commercial Building Type

A mixed use or commercial building type generally occupies the full lot frontage with a limited setback. Buildings should engage the street and sidewalk with outdoor displays, dining areas, and a primary pedestrian entrance as well as substantial glazing, which enables pedestrians to see the activity inside and patrons to see the activity on the street. Uses, including residential, may be mixed within one building or mixed across multiple buildings on one site.

Civic Building Type

Civic buildings such as community and public facilities play an important role in the community. A civic building is a building used for purposes that are public in nature including, but not limited to: schools, libraries, government buildings, and religious and institutional uses. Civic buildings should act as community landmarks utilizing key sites and be designed to provide architectural emphasis through materials, massing and detail. It is expected that the scale and architectural sophistication of these buildings will match their civic importance.

Residential Building Type

Residential Building Type

Mixed Use Building Type

Commercial Building Type

Civic Building Type

SECTION II: DEVELOPMENT STANDARDS

Bulk Standards Table

	Residential	Civic	Mixed Use or Commercial
Front Yard Set Back Primary Street ¹	20' Min - 80' Max	0' Min - 80' Max	
Minimum Façade Width ²	45% of the lot must be occupied by building		
Side Yard Set Back ^{3,4}	5' Min	5' Min, 0' if developed with adjacent properties	
Rear Yard Set Back ⁵	5' Min	5' Min, 20' Min when abutting residential	
Maximum Building Height	3 Stories in 45 feet		
First Floor Height	N/A	One Story: 16' Multi-story: 14'	
Glazing Requirements	N/A	N/A	Ground Floor 40% Upper Floors 25%
Architectural Standards	Structure must be built or clad with a high finish material that doesn't terminate at the corner. Material must wrap around the corner at least 10'		

¹ EXCEPTIONS TO FRONT YARD SETBACK: Exceptions may be made for recesses up to 5' for articulation of the building façade and up to 20' for outdoor seating areas.

² EXCEPTIONS FAÇADE WIDTH: Exceptions may be made for automobile convenience uses. See Building Type Standards

³ EXCEPTIONS TO SIDE YARD SETBACKS: Side yards with street frontage, on corner lots, shall follow front yard setbacks.

⁴ EXCEPTIONS TO SIDE YARD SETBACKS: Setbacks between townhouse units may be 0 ft.

⁵ REAR YARD SETBACK EXCEPTION: Development abutting property with an existing residential use shall comply with the applicable buffer yard standards of Title 17.

SECTION II: DEVELOPMENT STANDARDS

Architectural and Building Type Standards

Architectural Treatment Standards

Permitted Attachments

- Balconies, stoops, porches, and bay windows shall not encroach beyond the front setback.
- Porches shall be a minimum of 6 feet deep.
- Stoops and balconies shall be a minimum of 4 feet deep.
- Entry stairs, awnings, and canopies may encroach beyond the front setback, but shall not encroach into the public right-of-way without proper permitting from Metro Public Works.

Glazing

Minimum glazing requirements shall be calculated based on the façade area as follows:

- Non-Residential first floor: façade area shall be measured from the average grade at the sidewalk to 14 feet above grade.
- Residential first floor and all upper floors: façade area shall be measured from finished floor elevation to finished floor elevation.
- The glazing requirements for buildings on corner lots shall return a minimum of 20 feet along the side façade.

Materials

- Building fronts must be built or clad with a high-finish material, such as (but not limited to): brick, brick veneer, stone, and hardy board
- Prohibited materials: plywood, plastics, unfinished concrete block, metal buildings, Vinyl siding, E.I.F.S. (on ground floor).
- Primary façade materials shall not change at outside corners and shall wrap the corner a minimum of 10 feet.

Standards Specific to Building Types

Townhouse Courts, Cottage Courts, and Courtyard Flats (Residential Building Type)

Housing types that front a central open space.

- The width of the central open space, measured between buildings, shall be no less than the height of the buildings, measured to the bottom of the

eave or top of parapet.

- Dwellings shall abut a minimum of two sides of the central open space.
- Parking, driveways, and detention areas shall not be located within central open space. Modifications may be permitted for stormwater elements such as rain gardens and bioswales when incorporated as a design element.
- Parking adjacent to the open space shall be separated from it by landscaping or an architectural screen.
- Interior sidewalks, a minimum of 5 feet wide, shall connect all units to the sidewalks at the street frontage and the parking areas.

Corner must be wrapped to a depth of 10 feet with a high-finish material

SECTION II: DEVELOPMENT STANDARDS

Parking and Access Standards

Pedestrian Access

- Sidewalks along Murfreesboro Road must be provided in accordance with the Major and Collector Street Plan.
- All Buildings must have a direct connection from the public sidewalks along Murfreesboro Road to the buildings primary entrance.
- Buildings fronting a public street shall have a minimum of one pedestrian entrance along the street for every 150 feet of frontage.
- Parking is to be separated from structures with a sidewalk and planting strip.

Cross Access and Joint Access

- Cross Access, which allows for vehicles to pass between properties without entering the public right-of-way, and/or Joint Access, a shared driveway providing access to multiple properties via one driveway, shall be required. An easement agreement which provides for the mutual right of ingress and egress for both property owners shall be recorded with the Register of Deeds and be referenced on a final plat and in any restrictive covenants, and shall be referenced on the site plan.

Driveway Access

- One driveway per street frontage, **if no other access options are available**, 2 per street frontage for parcels with 400 or more feet of frontage, joint and cross use provisions required

Parking Structures

- The ground floor of any parking structure that fronts an at-grade public street (excluding alleys) and is within Subdistrict 1 shall be set behind a liner building with a minimum width of 15 feet so the parking structure is not visible from the street except at the point of a driveway access.

Joint and Cross Access easements must be utilized and created

Joint Access: Properties share an access point creating a unified entrance/exit for multiple properties

Cross Access: Properties utilize a connection between parking lots to allow for traffic flow on-site on off the major road.

SECTION II: DEVELOPMENT STANDARDS

Parking and Access

Parking Location

- Parking shall be located behind, beside or beneath buildings on all lots except as follows:
- One module of parking (two rows and a drive aisle) is permitted between the building and the street.

Parking Setback

- Garages shall be set back from alleys and streets 5 feet or greater than 15 feet.
- Parking areas that accommodate 4 or more vehicles shall be separated from buildings a minimum of 8 feet in order to accommodate a sidewalk and planting area.

Parking Lot Lighting

- Lighting shall be appropriate in function and scale for both the pedestrian and the vehicle. Lighting that minimizes light trespass, pollution, and uplight shall be utilized.

Drive-throughs

- Drive-throughs should be located to the rear of buildings. If drive-throughs are located to the side of buildings, their width shall be limited to two lanes and they shall be recessed from the front façade by a minimum of 20 feet. In no case shall drive-throughs be located at the corner of two public streets.

Vehicular Drop-offs

- Vehicular drop-off areas shall be articulated through paving patterns, bollards, landscaping and other means that limit the impact of conflicts between vehicles and pedestrians.

Bicycle Parking

- Multi-family residential development shall provide bicycle parking at a minimum of 2 spaces or 1 space per 10 bedrooms, which ever is greater. 50 percent of the parking shall be covered.
- Non-residential development shall provide bicycle parking at a minimum of 2 spaces or 1 space per 15,000 square feet, which ever is greater.

One module of parking (two rows and a drive aisle) is permitted between the building and the street.

SECTION II: DEVELOPMENT STANDARDS

Landscaping, Buffering and Screening Standards

The following requirements shall apply to all surface parking lots that have five or more parking spaces or are larger than seven hundred and fifty square feet.

Parking areas adjacent to public streets

- Parking areas and driveways shall be separated from the edge of the right-of-way by a perimeter landscape strip a minimum of 10 feet wide and planted with evergreen shrubs to screen parking area.
 - All shrubs shall be a minimum of 2 feet, 6 inches in height at the time of installation, forming a hedge that provides screening year-round.
 - Vegetation shall be maintained at a maximum height of 3 feet.
- Perimeter Landscape strips that include a fence or wall may be reduced to 7 feet wide and the evergreen shrubs may be deleted in lieu of other natural or plant material.
 - The wall shall be between 2 feet, 6 inches and 3 feet, 6 inches in height.
 - The fence shall be a minimum of 3 feet in height and a maximum of 4 feet in height. The fence shall be a minimum of 30 percent transparent.
 - Fences and walls shall be placed at the back of the planting strip, so any vegetation is between the wall or fence and the sidewalk.
- A minimum of one tree shall be preserved or planted in the perimeter strip for each 30 feet of parking area perimeter, or portion thereof.
 - Trees shall be a minimum of 2 inches in caliper and 6 feet in height at planting.

Parking areas adjacent to side or rear property lines

- Parking areas shall be separated from adjacent side lot lines by a perimeter landscape strip at least 5' in width. The standards of the Metro Code for Side Property Lines, 17.24.150 B shall apply.

Interior Landscaping Requirements

- A landscape island at least 7 feet in width is required between every 10 contiguous park spaces
- Planting islands including flowers, ground cover and shrubs shall be provided at vehicular access points to external streets.

Street Trees

- Shade-producing shade trees must be provided in a planting strip in the public right-of-way along the entire frontage.
 - Street trees shall be planted every 50 feet on center.
 - Trees shall be a minimum of 2 inches in caliper and 6 feet in height at planting.
 - Understory trees can be utilized in areas in conflict with overhead utility lines.

SECTION II: DEVELOPMENT STANDARDS

Landscaping, Buffering and Screening Standards

Mechanical, Service, and Loading Screening

- All outdoor equipment, such as HVAC and ventilation systems, utility meters and panels shall be placed on the roof, to the rear or side of buildings, or otherwise visually screened from the street. Mechanical equipment shall not be allowed along the frontage of a public street. Mechanical equipment on the roof shall be screened from abutting streets with parapets or other types of visual screening.
- All solid waste, recycling, and yard trash containers, including grease containers, and loading docks shall be located in parking areas, or at the side, or rear of a building, furthest from the public sidewalk. They shall be screened to minimize sound and visibility from residences, abutting sidewalks and streets, excluding service lanes.

Screening methods include: Vegetative Material as well as Fences and Walls.

- Vegetative materials shall be planted in two rows in staggered fashion.
- All trees shall be evergreen with a minimum height at time of planting of at least six feet above the root ball.
- All shrubs shall be evergreen with the minimum height and spacing necessary to fully screen the item intended for screening (but no less than thirty inches in height) at the time of planting.
- Vegetative material shall be located immediately adjacent to the element being screened in a planting area a minimum of four feet wide.
- Fences and walls shall be a minimum of 2 feet higher than the element being screened. Gates may be required to fully screen elements that face public streets.

** In order to properly locate and screen mechanical equipment, approval may be required from Metro Water Services, NES, and/or Metro Codes.

Fence and Wall Standards

- Fences and walls within the front setback and in front of buildings on side property lines facing public streets shall be constructed of wood, brick, masonry, vinyl, ornamental iron or aluminum, or similar materials. Chain-link shall not be permitted within the front setback or between buildings and the street.
- Fences and walls constructed between the principal building and the street (excluding alleys) shall not exceed 4 feet in height.
- Fences and walls along rear lot lines, behind a principal building, and along side property lines not fronting a street shall not exceed 10 feet in height.
- All fences shall be installed so that the finished side faces outward; all bracing shall be on the inside of the fence.

SECTION II: DEVELOPMENT STANDARDS

Signage Standards

The Signage standards of the Murfreesboro Pike UDO allow each business to communicate its message clearly without clashing with the envisioned visual character of the area. The goal is to encourage attractive, appropriate-scaled signage that contributes positively to the surroundings, provides businesses with sufficient visibility to the community, and reduce visual clutter.

General Standards

- In addition to the standards of this section, signage shall comply with the following sections of Chapter 17.32 Sign Regulations: Exempt signs 17.32.040; Prohibited signs 17.32.050; Permitted On-premise Temporary signs 17.32.060; Computations 17.32.160; and Sign Procedure 17.40.490.
- Refer to Title 17.04.060 for the definition of “sign.”
- Signs shall not obscure architectural features or details including, but not limited to, fenestration details, doors, or cornices.
- Signs may encroach into the public right-of-way with proper permitting through Metro government.
- Buildings shall not be painted to act as signs.

Common Signage Plan

- When more than one use or business is located on a lot a common signage plan shall be required. The common signage plan shall establish an allowable area of signage and the general sign locations for existing and future tenants with regard both to on-premises building and on-premises ground signs. The common signage plan shall be approved prior to issuance of any permits.
- For a development existing prior to the effective date of the ordinance codified in this chapter, a common signage plan may be submitted. The common signage plan shall indicate existing nonconforming signs as well as the amount and location of on-premises signage to be allocated to each tenant under the new plan.
- A common signage plan that measures the façade of the larger building as opposed to individual tenant spaces can benefit tenants by slightly increasing the permitted size of individual signs.

Prohibited Signs

- Billboards

Exempt signs

- Every restaurant use is permitted one Menu sign to be placed on the building adjacent to the main entry.

Illumination

- Externally lit signage using uplighting, downlighting, or backlighting techniques shall be permitted.
- Internal lighting shall be permitted to illuminate letters and logotype only. Sign backgrounds shall be opaque.
- Portions of signs with manual changeable copy may be internally lit to illuminate the background of the sign.
- Transformers and other mechanical equipment related to sign illumination shall be located inside the building or otherwise concealed from public view. Exposed raceways must be colored to match the sign or the building wall that the sign is attached to.
- External lighting sources shall be directed and shielded so that they do not produce glare off the site or on any object other than the sign. Bulbs should not be visible.

SECTION II: DEVELOPMENT STANDARDS

Signage Standards: Sign Types

Permitted Sign Types

Building Signs

- Building Mounted Flush: a sign attached to a wall that does not project more than 1 foot. (Wall Sign)
- Building Mounted Projecting: a sign attached to a wall that projects outward from the wall more than twelve inches; or a sign suspended from any structure that constitutes a covering or shelter such as a canopy, portico or marquee. Usually, though not always, the face of a projecting sign will be perpendicular to or form a wide angle with the surface to which it is attached.
- Building Mounted Projecting – 2nd Story and Above
- Awning Sign: application of words, lettering and/or logos to an awning.
- Window Sign: any sign attached to or directly applied on a window or glass door; intended for viewing from the exterior.

Ground Signs

- Monument Sign: a low profile sign with a base that is at least 3' wide or 50% of the maximum width of the sign (whichever is greater).
- Pillar Sign: a ground sign with two vertical posts constructed of masonry materials. The entire sign area shall be contained between the posts.

Permitted Sign Standards

- Each multi-tenant principal building may display not more than two on-premises building signs with a combined sign area of not more than thirty-two square feet.
- In addition to the principal building signage each occupant of a multiple occupancy complex may display on-premises building signs on any exterior viewed portion of the complex that is part of the occupant's unit. The total sign area shall not exceed fifteen percent of the facade area for the public entry side. Occupants may divide the permitted signage among the applicable facades, but a signage bonus is not given for an additional entry.
- Each single-tenant building may display on-premise building signs with a total sign area that shall not exceed fifteen percent of the facade area for the public entry side or a maximum of 128 square feet, whichever is greater. Occupants may divide their permitted signage over all façades of the building, but a signage bonus is not given for an additional entry.
- Where the owner of a multi-tenant building so chooses, a common signage plan in accordance with the standards for a single occupancy building may be submitted.
- Ground signs shall be permitted according to the Ground Signs Table.
- Facade area shall be calculated by multiplying the façade length by a height of 16 feet.

SECTION II: DEVELOPMENT STANDARDS

Signage Standards: Sign Types

Building Sign Flush

Building Sign Projecting

Window Signs

Awning Signs

Monument Signs

Pillar Signs

SECTION II: DEVELOPMENT STANDARDS

Signage Standards: Tables

Non-Residential Uses: Building Signage Table

Sign Type	Maximum Display Surface of Individual Signs	Maximum Height	Maximum Projection	Specifications
Wall Mounted Projecting ⁴	12 square feet	Below 2nd Story FFE or below top of parapet/eave, whichever is less	6 feet from building façade	Minimum Clearance is 8 feet or 10 feet within 10 feet of the right-of-way
Wall Mounted Projecting (Second Story and Above) ⁴	5% of the building façade on the public entry side or a maximum of 64 square feet whichever is less	Below top of parapet/eave	N/A	N/A
Wall Mounted Flush ⁴	5% of the building façade on the public entry side or a maximum of 64 square feet for single story buildings and 84 square feet for multi story buildings, whichever is less			
Awning ⁴	40% of all visible faces	N/A	N/A	On 1st story only, On a maximum of 2 awning faces
Window	15% of window			On 1st and 2nd story only

Non-Residential Uses: Ground Signage Table

Sign Type	Permitted	Maximum Display Surface of Individual Sign Height	Maximum Height	Minimum Setback from Side Property	Specifications
Monument ^{2,3}	1 per street frontage	48 square feet	7 feet or 2.5 feet within 15 feet of a driveway	3 feet	None of the signage are may extend above the masonry pillars
Freestanding Pillar ^{2,3}	1 per arterial street frontage for buildings with a setback greater than 15 feet		20 feet		

Residential Uses: Signage Table

Sign Type	Permitted	Maximum Display Surface of Individual Sign Height	Maximum Height	Maximum Projection	Specifications
Monument ^{2,3}	1 per street frontage	20 square feet	5 feet or 2.5 feet within 15 feet of a driveway	N/A	A low wall may be substituted for a monument sign
Building (3-15 units) ⁴	1 flush building sign per street façade	6 square feet	Below 2nd story Finished Floor Elevation (FFE) or below top of parapet/eave		Signs shall not include internal lighting
Building (16 or more units) ⁴		20 square feet			

¹ Any sign that encroaches on a public right-of-way must meet Metropolitan Government's current clearance standards and the encroachment must first be approved under the mandatory referral process.

² Maximum of one Ground Sign permitted per street frontage for non-residential development.

³ Properties with greater than 400 feet of frontage shall be permitted two ground signs. Signs on a single property shall be spaced a minimum of 100 feet apart.

⁴ No building sign shall protrude over the top of the parapet or eave of the main roof of a structure
